

SHASHANK KESAVAMATHAM

Chicago, IL | 331-230-2967 | kesavamatham.1@buckeyemail.osu.edu

EDUCATION

The Ohio State University

Columbus, OH

Bachelor of Science in Computer Science and Engineering

Expected Graduation: Summer 2027

- **Concentration:** Cybersecurity and Artificial Intelligence
- **Related Coursework:** Information Security, Data Structures, Databases, Discrete Math, Discrete Structures

PROFESSIONAL EXPERIENCE

Griffiss Institute – Viceroy Envoy Internship

San Antonio, TX

Cybersecurity Intern

June 2026 – Present

- Ongoing

Triangle Cyber – AWS Cloud Security Internship

Remote

Cloud Security Intern

May 2026 – Present

- Ongoing

PROJECT EXPERIENCE

AES-Powered Steganography Messenger Tool

August 2025 – September 2025

Skills: Cryptography | Pillow | AES | Steganography

- Embedded encrypted messages into images with **<0.03%** pixel distortion, preserving visual fidelity during transmission.
- Built a Python messaging tool with AES encryption and LSB-based image steganography for secure communication.
- Implemented **AES-GCM** with **PBKDF2** key derivation, ensuring confidentiality and integrity during transmission.

Malware Image Classification (1st Place / 50+ Competitors – BDAA Club)

February 2025 – April 2025

Skills: CNNs | Keras | Tensorflow | Pandas | Numpy

- Developed a CNN model using TensorFlow (GPU) and Keras to classify **30** malware families, converting raw binaries into grayscale image representations for automated analysis and detection.
- Engineered a preprocessing pipeline, normalization, and feature extraction to improve model performance and speed.
- Achieved **94%** classification accuracy through model evaluation and validation, improving malware detection reliability.

INVOLVEMENTS

Cybersecurity Club

Columbus, OH

Active Member

January 2025 – Present

- Attended **10+** weekly workshops on fundamental web exploitation, threat detection, and incident response topics.
- Solved **25+** CTF challenges applying various reconnaissance, privilege escalation, and post-exploitation techniques.

Big Data Analytics Association

Columbus, OH

Software Developer

February 2025 – April 2025

- Built a React-based frontend for the project to display model predictions and performance metrics.
- Implemented Python data pipelines for binary-to-image conversion and preprocessing to streamline model training and inference.
